A
GO Biological Process
n = 4,031 genes
DNA-templated transcription
protein transport
vesicle-mediated transport
protein ubiquitination
intracellular protein transport
regulation of transcription by RNA polymerase II
RNA splicing
proteasomal protein catabolic process
macroautophagy
DNA repair

B
GO Molecular Function
n = 4,185 genes
protein binding
RNA binding
zinc ion binding
ubiquitin-protein transferase activity
nucleic acid binding
mRNA binding
ATP binding
small GTPase binding
chromatin binding
identical protein binding
