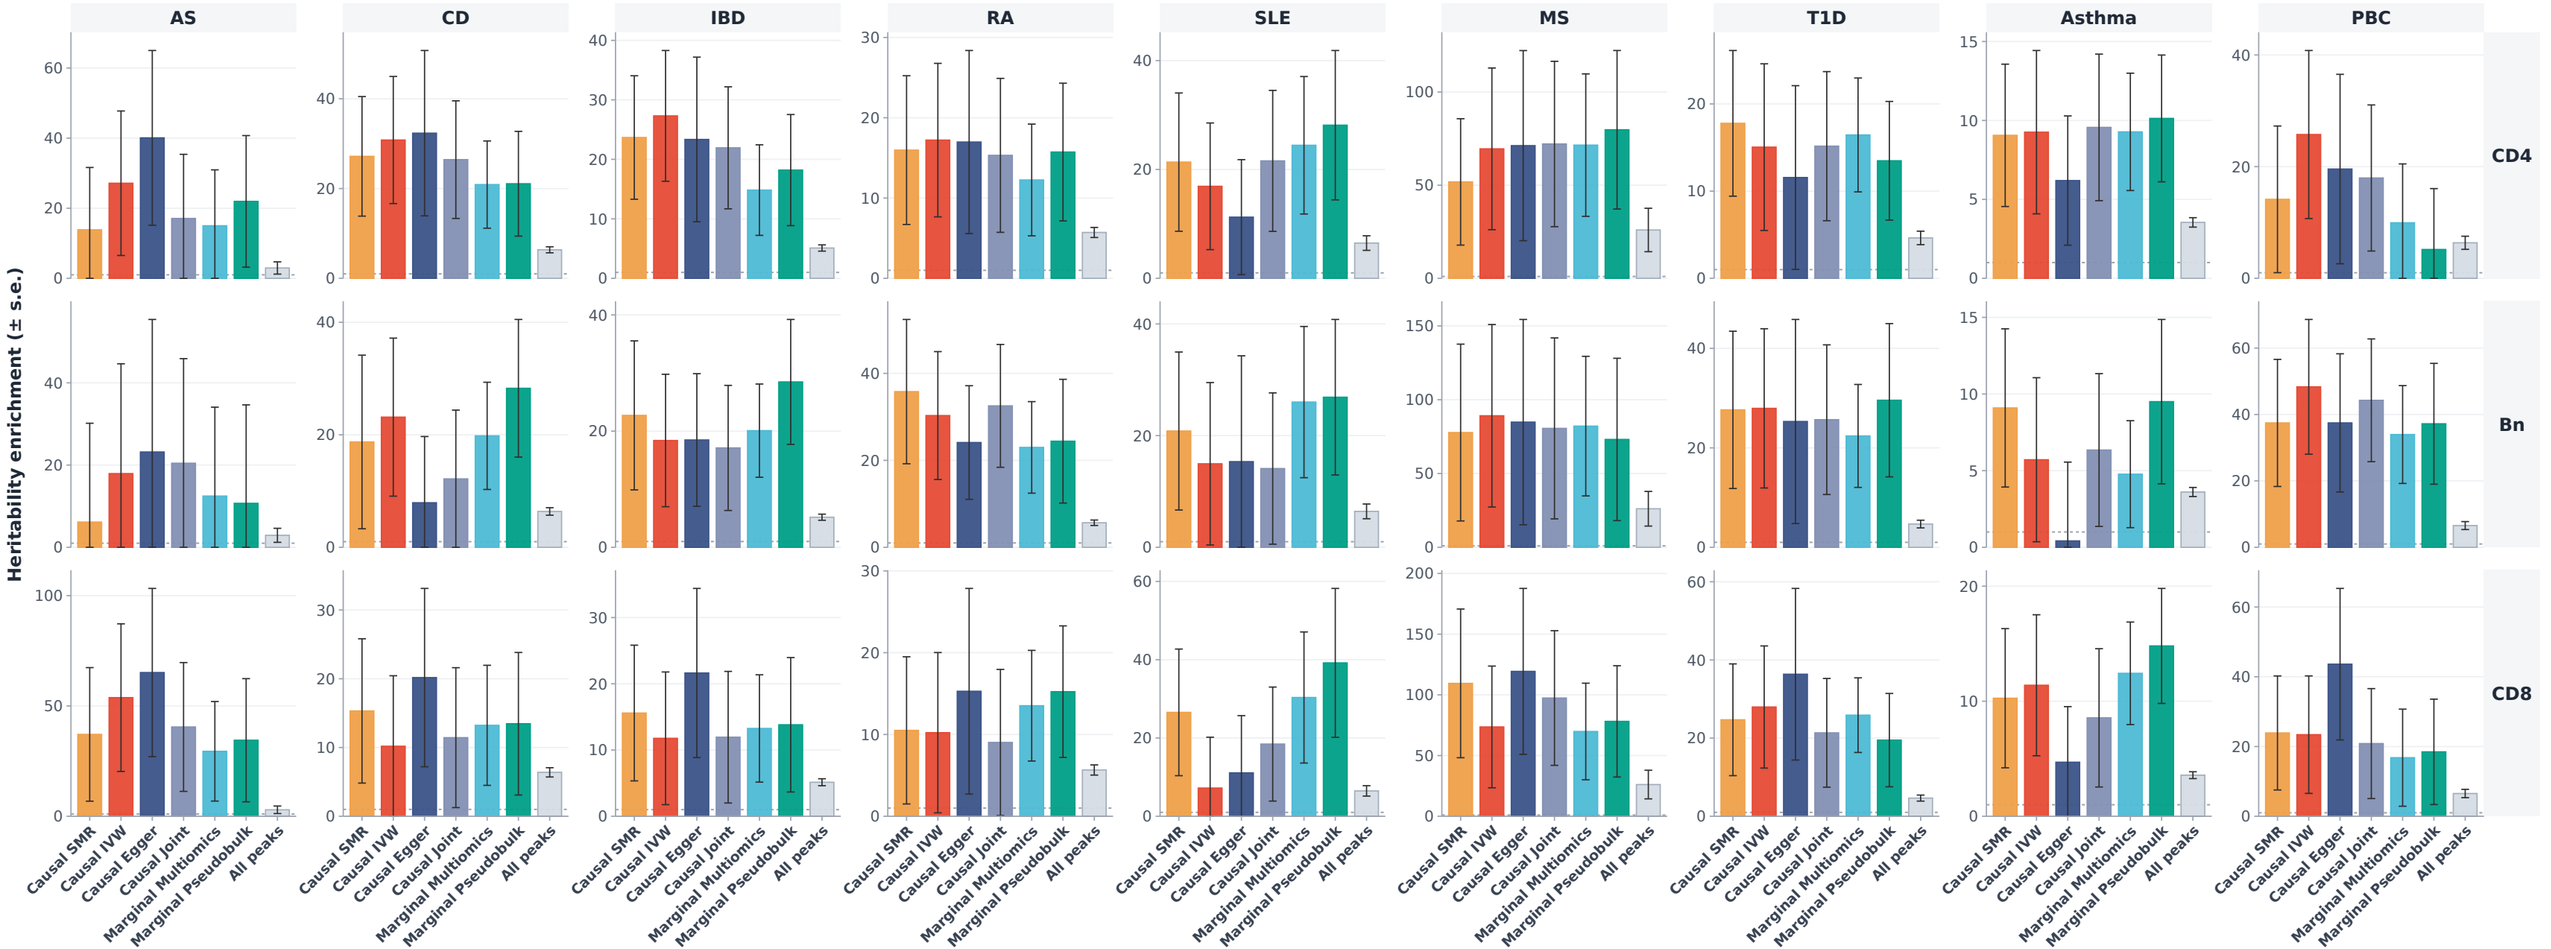
# S-LDSC heritability enrichment of MR-linked peaks

Peak extension = 500 bp; significant peak-gene links at FDR < 0.05 per method; All peaks = all candidate peaks of the cell type. Each annotation conditioned on 97 baseline-LD annotations. Dashed line: enrichment = 1.


**Peaks** Causal SMR | Causal IVW | Causal Egger | Causal Joint | Marginal Multiomics | Marginal Pseudobulk | All peaks
